This volume of exercises is especially for trumpet, but will be useful for many instruments in treble clef. It covers all major and minor scales and arpeggios, chromatic scales, diminished and augmented arpeggios, and some modal scales.

When playing scales and arpeggios, feel the continual flow of air through the notes. Even though most of the notes are notated as tongued, also practice them slurred to get the feel of blowing continually through the notes as they rise and fall. Keep this same feel of air flow as you tongue the notes.

Where some passages get higher than about a G, alternate lower notes are given. Choose the most comfortable notes for your range and ability.

Available online at www.ultrapureoils.com, along with other sets of educational materials especially written for trumpet players. It is also available at www.sibeliusmusic.com.

Any questions -- write to ken@ultrapureoils.com.

Only continue as high as you are comfortable with.
DIMINISHED AND AUGMENTED ARPEGGIOS
Modal scales are built from the pitches of the major scale, but starting on different degrees of the scale. The seven diatonic church modes are shown below. They are the same descending as ascending.

Some modes are more like major and some more like minor.

**Like Major:**

- Ionian (same as Major)
- Lydian -- major with raised 4th.
- Mixolydian -- major with lowered 7th.

**Like Minor:**

- Aeolian (same as natural minor)
- Dorian -- natural minor with raised 6th.
- Phrygian -- natural minor with lowered 2nd.
- Locrian -- natural minor with lowered 2nd and 5th.
Dorian mode
cantabile
